-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Fang *et al.* (Equipment for High-Pressure Infrared Measurements, enclosed).

With respect to claim 2, Fang *et al.* demonstrates the use of an infrared cell, which is able to withstand pressures of 0-1500 atm (page 24, section C).

Allowable Subject Matter

3. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1 and 4 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 1, the infrared cell disclosed by Walker *et al.* (3,886,364) includes a steel cell (column 3, line 13) capable of withstanding high pressure (column 3, lines 1-6) and includes transmission windows for infrared analysis (column 3, lines 27-30). Walker *et al.* neither discloses a cell, which is capable of withstanding pressures in the range of 20 Pa or lower, nor a

measurement method which would require such a pressure, as indicated by applicant. Fang *et al.* demonstrates the use of an infrared cell, which is able to withstand pressures of 0-1500 atm (page 24, section C), but fails to disclose the measurement method as taught by applicant.

With respect to claim 3, Fang *et al.* shows an infrared cell as applied to claim 2 above, which is constructed of stainless steel, but shows neither an optical path length of 5 to 40 mm, nor window panels with thicknesses of 2 to 8 mm (page 24, section C).

With respect to claim 4, the infrared cell disclosed by Walker *et al.* (3,886,364) is made from stainless steel or Hastelloy (column 4, lines 37-39), but does not show window panels made of quartz or sapphire, having an optical path length as claimed or a thickness as claimed. Fang *et al.* shows an infrared cell as applied to claim 1 above, which is constructed of stainless steel, but shows neither an optical path length of 5 to 40 mm, nor window panels with thicknesses of 2 to 8 mm (page 24, section C).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark R. Gaworecki whose telephone number is (571) 272-8540. The examiner can normally be reached on Monday through Thursday, 7:00-5:30.
